# ASAC 7th Annual Health and Safety Summit

## SESSION DESCRIPTIONS

### ALL DAY TRAINING SESSIONS

#### Supervisor Training Program | STP

STP is a construction specific training curriculum developed, updated and field tested by and for contractors. Supervisory skill, or the lack of it, directly affects every company's bottom line. **SEE ASAC calendar at [www.ASAColorado.com](http://www.ASAColorado.com) for the 2020 STP courses.**

#### Unit 6 Risk Management

##### Tony Seidling, VP Operations

*FCI Constructors*

This session covers the roles and responsibilities of a construction supervisor in accident prevention and loss control.

Discussion topics include: planning for site safety, site safety management, Site security and protection, multi-employer jobsite safety, construction risk management, safety and human resources, and regulatory procedures, record keeping and documents

#### Safety Builder

##### Tatiana Chapman, Training & Safety

*Consultant, Colorado Safety Association*

This session is specifically designed as a refresher for experienced workers, new hires and temporary construction workers as an introduction to the basic elements of workplace safety.

Topics of discussion include: understanding OSHA, employee & employer responsibilities for construction safety, basic safety philosophy, hazards in construction, hazard communication, confined space, material handling, personal protective equipment, scaffold safety, ladder safety, fall protection, electrical safety, trenching and excavation, housekeeping, site security and general public safety

## SESSION DESCRIPTIONS

### BREAK OUT TRAINING SESSIONS

8:15 a.m.

#### Reputation Risk and Crisis Management

*Kristin White, Attorney, Fisher Phillips Law Firm*

*Trish Ennis, Executive Director,*

*Colorado Safety Association*

According to the famous quote by Warren Buffet, "It takes 20 years to build a reputation, and five minutes to ruin it. If you think about that, you'll do things differently." Organizations that manage risk the most effectively are those that have a plan. This session will provide information and examples about how failing to manage safety in an organization can lead to reputation risk. We will discuss how to manage that risk, how to mitigate the risk if something does happen, and will explore the role the media plays in a crisis.

10:00 a.m.

#### Confined Space Planning & RESCUE Protocols

*Patrick Burke, HHS Safety*

*George Rex, SENDREX,*

*9-11 First Responder & CSE Trainer*

This session is not a training session, but explores how to handle the dynamic task of working with Confined Space properly. The session dives into rescue protocol with the emphasis on how do you get a worker out of a confined space in the case of injury or illness. What are the resources available and what is the role of those on site in a rescue situation?

This presentation is highly impactful.

#### American Subcontractors Association

**Colorado**

3575 South Sherman Street, Suite 3  
Englewood, CO 80113

Email [DSciso@ASAColorado.com](mailto:DSciso@ASAColorado.com)

12:30 p.m.

#### "Creating Safer Communities by reducing the Visibility Gap"

*Rich Lacey, Samba, Executive VP of Product and Engineering*

*Mark Ashby, LEAD Impairment Training, President*

Driver Safety begins with you. Understanding driver behavior will lead your company into more informed decisions. We will discuss the benefits of continuous driver monitoring, policy integration and training expectations. The goal of our program will be to lower risks, reduce costs and ultimately save lives.

2:15 p.m.

#### A Healthier Safer Team, Total Worker Health

*Mike Van Dyke, PhD, CIH – Associate Professor,  
Center for Health, Work and Environment*

*Katie Guthmiller, MPH, CHES – Total Worker  
Health Program Coordinator, Health Links*

Integrating Worker Health and Safety: A safety practitioner perspective and six key benchmarks to achieve Total Worker Health®.

Envision a workplace where employees feel empowered, productive, creative and inspired by their work – a place where employees leave healthier than they came. Changing employment patterns, new technologies, and an aging population are among the issues facing our workforce. By leveraging the right resources; leaders, managers, and workers can adapt to these shifts and support a workplace culture that supports and promotes health, safety and overall well-being. This training will present why integrating health and safety is important and how to apply a Total Worker Health® (TWH) approach to any workplace – using data-driven strategies to help champion worker well-being.
